

My first markdown class

The second line

The third line

fourth level header

fifth level markdown

Normal text

Bolding a text:

To bold a text, we put the text in double asterics as follows **this text is ment to be bold**

Italizing text:

put the text in a single asterics qoutes as shown below *the text should be italized*

Making a text with code font

The text should be put in a single qoutation mark 'this is code font'

Links and hyperref

Here is a demo on how to put a link in markdown and hyperref. For example, click here to visit my webpage
